

Load cell platform kit

- ◆ Contains everything you need to create an intelligent industrial scale
- ◆ Ideal for standard or bespoke platform sizes
- ◆ Robust, OIML R60 approved load cells
- ◆ Adjustable 'ball and cup' feet for uneven surfaces
- ◆ Intelligent instrumentation for weighing, counting and checkweighing
- ◆ Mains or battery powered for any location

The Avery Berkel Load Cell Platform Kit contains all the elements required to produce a robust, integrated industrial scale with the intelligence and reliability you expect.

The kit is designed to provide a fast and simple means of creating standard or bespoke weighing platforms. It contains the well proven T206 load cell, stabilising feet, an aluminium junction box and the flexible L122 indicator and can easily be matched to any size of bottom plate to suit the installation.

Avery Berkel

Create standard & bespoke platforms with ease

- ◆ **Robust and reliable**
The four OIML R60 approved, T206 load cells bolt straight into any platform size for ease of installation. With stainless steel gauge covers and waterproof to IP66, they are ideal for the rigours of factory environments.
- ◆ **Any surface – anywhere**
The adjustable load cell feet are designed and built to ISO 9001 and ensure excellent stability on any surface – even rutted or slippery floors.
- ◆ **Easy to read – simple to use**
The L122 indicator provides a host of intelligent functions to turn your scale into a fully integrated weighing, counting and checkweighing system. The large key, tactile keyboard is simple to use and the LCD display is easily visible, even at a distance.
- ◆ **Battery options**
The indicator includes an internal rechargeable battery as standard and an easily accessible dry cell battery compartment - so you can weigh where it is most convenient.
- ◆ **Industrial strength**
Available with an aluminium junction box to suit industrial environments.
- ◆ **Range of load cell capacities**
Load cells are available in either 1, 2, 3 or 5 tonne capacities.
